Tools: Snowflake, Git, Power BI, Azure Data Studio, Azure Data Factory, Azure DevOps, Azure Storage, React, Docker, Postman, Bruno, Langflow, Azure/AWS Databricks, Windsurf/Codium

EXPERIENCE

Universal Destinations and Experience – Data Science Intern; Orlando, Florida

June 2026 – August 2026

- Retrained USH fall price elasticity models using historical data and adjusting model inputs to strengthen forecasting accuracy
- Delivered a fast turnaround analysis quantifying ticket sales lift from pricing recommendation adoption, aiding leadership decisions
- Built an analytical framework across multiple databases and business logic layers to evaluate pricing recommendation adherence
- Designed a Power BI booking curve dashboard tracking ticket sales pacing against budget targets, enabling performance visibility

PROS, Inc. – Software Engineer Intern II; Houston, Texas

June 2025 – August 2025

- Engineered AI Agent chatbot with pipeline integration and UI chat service using Langflow for real-time customer error resolution
- Led company hosted team hackathon initiative by identifying pain points and developed AI-powered support solution
- Transformed complex validation errors into actionable insights through AI Agent deployment using a chat interface
- Pioneered AI Agent solution deployment independently, integrating cutting-edge technology into existing team infrastructure

PROS, Inc. – Software Engineer Intern; Houston, Texas

June 2024 – August 2024

- Repaired production bug that prevented PROSai Gen IV Science from succeeding, reducing 12-72 hours from program operations
- Enhanced a task to correctly log invalid data resulting in quicker troubleshooting for training failures due to data conditions
- Implemented integration tests including BDDs and worked with QEs to document end-to-end testing, preventing possible bugs
- Worked with a B2B development team including attending daily Scrum Sprint/Jira tracking, increasing team efficiency by 15%

PERSONAL PROJECTS

Simple Cruise Revenue Management POC

- Developed a cruise revenue-management POC in Python using statistical forecasting to generate pricing recommendations
- Built a web application with a React (Vite) frontend, FastAPI backend, and PostgreSQL database for robust, scalable deployment.
- Delivered an interactive platform enabling dynamic visualization of results and streamlined analysis of pricing strategies.

Personal Portfolio

- Engineered a responsive personal website utilizing HTML, CSS, and JavaScript and published using Github Pages for public access

ACTIVITIES

Asian Business Student Association – Active Member

August 2023 – May 2025

- Strengthen my connections with over four Fortune 500 companies professionals by attending biweekly meetings

ADDITIONAL INFORMATION

Languages: Proficiency in Vietnamese, basic knowledge of Spanish and Korean

Interests: Instruments, reading, writing, singing, skating

Skills: Quick learner, proficient social skills, socially perceptive, organizational skills

Work Eligibility: Eligible to work in the U.S. with no restriction
